Bristol, UK | joeodams@gmail.com | 07415 312171 | joeodams.co.uk

PROFILE

Software developer with commercial experience building business-critical systems in fintech and startup environments. 8 years experience in C#/.NET backend development with React proficiency. Known for writing clean maintainable systems, accurately refactoring fragile code, building out unit test suites, and delivering high-impact features involving financial calculations, valuation data, and distributed services.

TECHNICAL PROFILE

Languages & frameworks: C#, .NET, React, Go, SQL, EF Core, MassTransit

Platforms & tooling: Azure App Services, Azure Functions, Redis, CI/CD, Git, Docker, Linux/VPS

Engineering focus: API and application design, distributed applications, domain modelling, refactoring legacy systems, automated testing

EXPERIENCE

Parmenion Capital Partners LLP | Software Developer | 2022 - Present | Bristol

- Work across back-office and front-office systems, plus peripheral distributed applications, in a regulated fintech environment.
- Implemented new trading-related functionality in core business systems and supported important financial workflows.
- Built a financial projection engine to support retirement modelling and planning outcomes.
- Made key contributions to a near-live Valuations Service designed for cross-business use and customer-facing figures, including in the company app.
- Improved robustness and correctness in portfolio performance logic, including reworking portfolio performance code to reduce bugs and edge-case failures.

Beedle | Senior Developer (Backend) | 2020 - 2022

- Backend developer at an education startup building an app for Microsoft Teams; took substantial ownership of API and core application code while supporting a team of 3-4 frontend developers.
- Built and maintained backend services deployed to Azure, including Azure Function projects and new API endpoints driven by product requirements.
- Improved code structure and maintainability across a growing backend codebase, optimised hot paths with async code and custom database routines, and introduced Redis caching.
- Added automated tests with SpecFlow and unit tests for key service layers; also handled releases and CI/CD responsibilities.

Landmark Information Group | Developer / Data Scientist | 2017 - 2020

- Built data pipelines and Azure Functions for internal business use within a geographical information services company.
- Created a JSON API over a legacy external SOAP service to reduce downstream complexity across the business.
- Developed automated tests and a document-classification API using Microsoft LUIS.

Equiniti Data | Data Analyst | 2016 - 2017

- Built a postal address matching and cleaning tool.
- Created a query-builder tool that reduced workload for the team.

SELECTED PROJECTS

Go API on personal VPS - Designed, deployed, and maintained a small production-style Go API on a self-managed VPS, including server setup and deployment workflows.

React Native bike-share app - Built a mobile app prototype from scratch in a matter of weeks, showing the ability to learn quickly and ship without a large team around me.

Data visualisation work - Created interactive data visualisations and frontend-heavy experiments for exploratory analysis and public-facing presentation.

Personal website - Built and maintain a technical portfolio site to showcase projects, writing, and software work.

ADDITIONAL INFORMATION

Industry exposure: Fintech, portfolio valuation data, projections, trading-related workflows, education software, geospatial/data applications

Working style: Strong code intuition, pragmatic refactoring, comfortable owning ambiguous backend work end-to-end, comfortable with React, very fast learner

Tools & interests: Side projects spanning Go, frontend work, APIs, deployment, and data visualisation

EDUCATION

University of Sussex | BSc Physics with Astrophysics (2:2) | 2012 - 2015

- Selected modules: Scientific Computing (1st), Mathematical Methods
- Research project: A Natural Galaxy Classification Scheme (68%)

Exeter College | A-levels | Maths (B), Physics (B), History (B)

EARLIER EXPERIENCE

BPA Quality, Exeter | Quality Analyst | 2015 - 2016

Worked on analysis of inbound and outbound customer-service interactions.
